Customer Problem Statement :

Streamlining Movie Ticketing Through Real-Time Atomic Seat Locking and Centralized Theatre Administration.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A movie enthusiast who regularly books cinema tickets for weekend premieres and popular releases with friends and family.	Quickly reserve preferred adjacent seats with transparent pricing without encountering booking delays or payment failures.	Ticketing platforms freeze during peak hours, fail to reflect live seat availability, and drop sessions during checkout.	Legacy systems lack real-time atomic seat locking, causing concurrency collisions when multiple users select the same seats simultaneously.	Frustrated by unexpected checkout errors, anxious about losing desirable seats, and dissatisfied with online cinema booking.
