Maximum Marks	

Project Overview:

Project Name: iMovies Description: A web-based movie ticket booking platform that connects moviegoers with cinema theaters. It includes catalog browsing, showtime scheduling, interactive tiered seat selection, digital M-ticket generation, and payment integration. Project Version: v1.0.0 Testing Period: 2026-10-10 to 2026-10-17

Testing Scope:

- User and admin registration and login (JWT authentication)
- Movie catalog exploration with title search and genre filtering
- Cinema theatre registration and auditorium capacity configuration
- Showtime scheduling with tiered ticket pricing (Lower, Middle, Balcony)
- Interactive real-time seat matrix with atomic locking and conflict prevention
- Payment gateway checkout and digital M-ticket QR pass generation
- Booking management and self-service seat cancellation
- Watchlist bookmarking and community movie review & rating system

Requirements to be Tested:

- As a moviegoer, I want to select and reserve preferred adjacent seats on an interactive layout without double-booking collisions.
- As a moviegoer, I want to complete secure payments and receive a digital M-ticket with a gate-entry QR code.
- As a theatre admin, I want to schedule showtimes, manage auditorium capacities, and audit live box-office revenue.
- As a user, I want to maintain a movie watchlist and submit verified ratings and reviews.

Testing Environment:

Testing Environment

- **URL**:http://localhost:5173 (Development) / https://imovies.example.com

- **Credentials**:
    - **Freelancer**: test.freelancer@example.com / password123
    - **Client**: test.client@example.com / password123
    - **Admin**: admin@example.com / adminpass

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	1. Navigate to /register 2. Fill in username, email, and password 3. Click "Create Account"	Account created, JWT stored in localStorage, and user redirected to /home	Account created, session active, redirected to /home	Pass

TC-002	Customer Login & Session Handling	1. Navigate to /login 2. Enter valid email and password 3. Click "Sign In"	User authenticated, token injected via Axios interceptor, customer navbar displayed	Authenticated successfully and redirected with active session	Pass
TC-003	Movie Search & Genre Filtering	1. Visit /home 2. Type movie title into search bar 3. Click genre filter pill (e.g., "Sci-Fi")	Dynamic catalog filters matching titles without page reload	Matching movie cards render dynamically (< 200ms)	Pass

TC-004	Atomic Seat Locking & Double-Booking Guard	1. Open show seat grid at /seatspage/:id 2. Select seats "L1", "L2" 3. Complete checkout 4. Attempt booking "L1" from a second session	First session books successfully; second session is rejected with HTTP 409 Conflict	First booking confirmed; second attempt displays "Seat already booked" toast	Pass
TC-005	Ticket Cancellation & Inventory De-allocation	1. Navigate to /bookings 2. Click "Cancel Ticket" on a confirmed booking 3. Confirm cancellation prompt	Booking marked CANCELLED; reserved seats restored to isBooked: false in show	Ticket status updated to CANCELLED and seats freed in show layout	Pass

TC-006	Admin Showtime Scheduling	1. Login via /login/admin 2. Navigate to /admin/addshow 3. Select movie, theatre, date, time, and submit	Show scheduled; 180-seat matrix auto-generated across Lower, Middle, Balcony tiers	Show published and tiered seating matrix initialized in MongoDB	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Missing required field validation on movie creation form	1. Login as admin 2. Navigate to /admin/addmovie 3. Submit form with empty title or description	Medium	Closed	Added client-side required checks and server-side Mongoose schema validation with toast alerts.

BG-002	Concurrency race condition on simultaneous seat checkouts	1. Open two browser sessions on same show 2. Select identical seat "B1" 3. Click "Pay & Book" simultaneously	High	Closed	Implemented database-level atomic conditional update verifying isBooked: false before reserving.
BG-003	Abandoned checkout sessions leaving seats locked indefinitely	1. Select seat in checkout 2. Close browser tab without completing payment	Medium	Closed	Integrated background node-cron cleanup worker (cleanupService.js) to auto-release holds older than 15 minutes.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
